

CODIGO

```
private static class HiloB implements Runnable {
    @Override
    public void run() {
        int i = 1;
        do {
            System.out.println( "Nombre: " + Thread.currentThread().getName() + ", ID : " +
                Thread.currentThread().threadId() + ", -> " +
                i);
        } while (i < 10);
    }
}
```

```
        i++;  
    } while (i < 14);  
}  
}
```

```
private static class HiloC implements Runnable {  
    @Override  
    public void run() {  
        int i = 1;  
        do {  
            System.out.println( "Nombre: " + Thread.currentThread().getName() +", ID :"+  
                Thread.currentThread().threadId() + ", -> " +  
                i);  
            i++;  
        } while (i < 14);  
    }  
}  
}
```
